Cram sheet, the five domain blocks

One page per domain.

Domain 1: Agentic Architecture & Orchestration (27%)

agentic loop, in one line	
seven stop_reasons. Star the three people forget.	1 2 3 4 5 6 7
delegation gotcha	
batch vs loop	
isolation rule	
four Anthropic failure modes and their pattern-fixes	1 2 3 4

Recall check (cover the sheet, answer cold): _____ of 5

Domain 2: Claude Code Configuration (20%)

CLAUDE.md hierarchy	
enforcement seam	
permission precedence	
escalation protocol (your three lines)	1 2 3
four false friends, in a single line	

Recall check (cover the sheet, answer cold): _____ of 5

Domain 3: Prompt Engineering & Structured Output (20%)

governing call	
structured-output facts	
schema is not semantics	

The **technique-to-failure map**: the seven techniques plus long-context structure, each next to the failure it fixes.

Technique	The failure it fixes
1	
2	
3	
4	
5	
6	
7	
Long-context structure	

Recall check (enforce or instruct?): _____ of 5

Domain 4: Tool Design & MCP (18%)

transport pick	
three primitives	
error classification	
tool_choice	
design rule	

Recall check (cover the sheet, answer cold): _____ of 5

Domain 5: Context & Reliability (15%)

context-rot rule	
detection rule	
escalate on policy, not vibes	
retry semantics	
stateless fact	

Recall check (cover the sheet, answer cold): _____ of 5
